

Continuing Care Program

The Continuing Care (CC) Program is an ASAM level 1.0 program offered to individuals who have completed an ASAM level 2.1 or higher level of care. This program is based on the Matrix Relapse Prevention 33 Session Program.

BADE Program

The Basic Alcohol and Drug Education (BADE) Program is designed to assist individuals who meet ASAM level 1.0. The individual is provided with basic information on alcohol and other drugs gathered from the National Institute on Drug Abuse and SAMHSA.

Equal Opportunity Provider.

FREMONT COUNSELING SERVICE

**Substance Use Services
and Group Information**

Our Mission:

To provide the highest quality mental health and substance abuse services to enhance lives and enrich our communities.

**Proudly Serving
Fremont County
Since 1959.**

How Program Eligibility Is Determined

Individuals interested in Fremont Counseling Service's substance use services programs or groups are required to self-complete an ASI-MV in our offices and then schedule an intake with a clinician in order to complete an Addiction Severity Index (ASI). This instrument is completed in conjunction with the American Society of Addiction Medicine (ASAM) Patient Placement Criteria (PPC).

The ASAM standards are the most often implemented measurements used by treatment centers for placement and treatment of clients with addictions and other mental health disorders.

<http://www.asam.org/publications/the-asam-criteria>

IOT Program

The Intensive Outpatient Treatment (IOT) Program is an ASAM level 2.1 treatment program designed to help individuals who struggle with drug/alcohol addictions. It is based on a modified Matrix Model for 8 weeks and a modified Wellness Recovery Action Plan (WRAP) Model for 2 weeks. The program meets three times each week and is followed by up to 33 weeks of the Continuing Care Program (see this section for more details).

All individuals desiring entry into the IOT Program must have an ASI evaluation with a recommended ASAM of level 2.1.

ARG Program

The Advanced Recovery Group (ARG) is an ASAM level 1.0 treatment program designed to help an individual who has relapsed after completing treatment at an ASAM level 2.1 or higher. It consists of eight 2-hour sessions followed by twenty 1-hour sessions.

The eight 2-hour sessions are based on the Substance Abuse and Mental Health Services Administration (SAMHSA) Technical Assistance Publication (TAP) 19 Relapse Prevention with Chemically Dependent Criminal Offenders.

The twenty 1-hour sessions is participation in the Continuing Care Program (see this section for more details).
